- Search processes, equipment, certifications, NAICS, SIC, products, materials, etc.
- And more!

**Please note these sections of the platform are still under development.*

Connex Florida is made possible through a partnership between the Associated Industries of Florida, Space Florida, and FloridaMakes.

Connex Florida is a statewide manufacturing supply chain, workforce and R&D connection solution offered free of charge to manufacturers, educational institutions, and those performing manufacturing R&D in Florida. This online database serves to streamline critical connections between Florida manufacturers and businesses in need of their products.

Here are a few reasons why you should have your company listed in the database:

SUPPLY CHAIN OPTIMIZATION

Connex Florida allows manufacturers to **strengthen supply chains**. Find alternate suppliers, view your supply chain visually, highlight risks within your supply chain looking at single supplier risk, financial risk, government blacklists, and other vulnerabilities, as well as finding Florida suppliers by searching the thousands of Florida manufacturers and filtering the results to match your needs.

BUSINESS RECOVERY AND RESILIENCE

Access to Connex Florida will allow you to **respond quickly** when a disaster strikes by giving you immediate access to new suppliers or supply chain partners. Plus, the platform is designed to be **interoperable with the Manufacturers Marketplace** that was developed by AIF and the National Association of Manufacturers (NAM), as well as the COVID-19 Response Tool that was recently announced by Vice President Mike Pence, NAM and the Business Roundtable.

DEVELOP NEW PARTNERSHIPS

If you are looking to **grow your business**, including looking for new capabilities, services, or if you are trying to develop new products and need new partners, Connex Florida allows you to search for relevant companies that will meet your needs.

BUSINESS DEVELOPMENT TOOL

Connex Florida has the capability to highlight all of your assets and relevant certifications, capabilities, and other relevant industry information to **help other manufacturers find you** to integrate into their supply chain. The platform allows you to view RFPs, RFQs, RFIs, requests for surplus materials or equipment, and other needs posted by other members of the database.
